Last Hope Gold Project - Manitoba

LOCATION

- High-grade resource.
- In March 2025, Alamos Gold broke ground on a 200,000 oz per annum gold mine and centralized ore processing plant, located roughly 8 km northeast of the town of Lynn Lake.
- Management has extensive experience in this region.
- The project valuation is attractive.

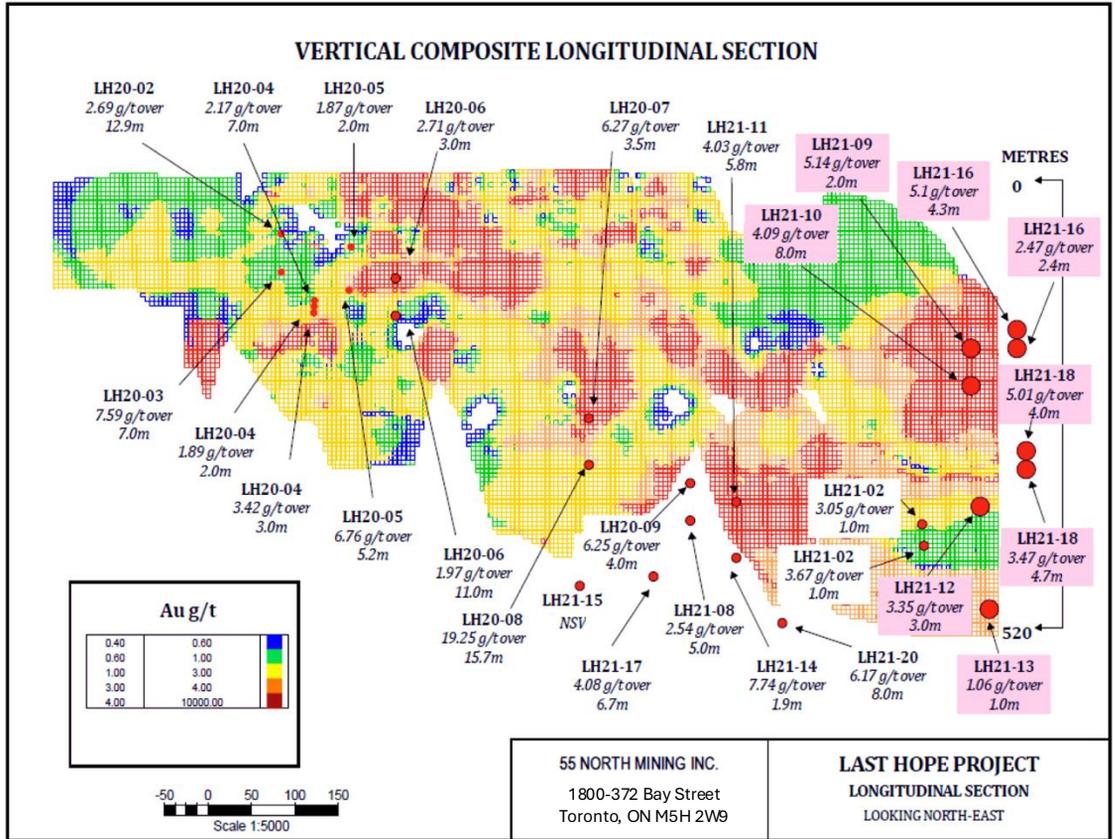

Lynn Lake Greenstone Belt within the Churchill Geological Province of the Canadian Shield

- Pre-Cambrian lode gold type deposit. Lies in the highly altered, Quartz-Pyrite-Biotite rich footwall of a fault on the periphery of an intrusive porphyry. The Johnson Shear Zone, host to at least 26 gold prospects with over 44 km strike length, lies approximately 10 km to the north.
- Current resource estimate:
 - Hosts Lode Gold style mineralization
 - Strikes South-East, dips near vertically, averages 6 m width
 - Open plunge to the South and at depth
 - Best hole was over 15 metres with a grade of nearly 20 grams per tonne

Last Hope Gold Project - Resource Estimate based on 181 drill holes

	Tonnes	Au g/t	Au oz (000)
Indicated	325,500	5.41	71.1
Inferred	1,537,300	5.48	273.8

Last Hope Gold Project - 2020/2021 Drilling Highlights
